DATE: FEB 11 1986

SUBJECT: A-Chem Corporation

FROM: *Stephen M. Browning*
Stephen M. Browning, On-Scene Coordinator
Western Response Unit

TO: Project File

Mr. Al Gergitas from the Chicago Metropolitan Sanitary District (MSD) called this writer at approximately 1400 hours on the 28th of January, 1986. Our conversation focused on the aforementioned subject. Mr. Gergitas orally transmitted analytical data from samples collected on Sunday the 26th of January, 1986. These results were as follows:

Total Chromium	Concentration	140 mg/l
Cr ⁺⁶	Concentration	1.25mg/l
Total CN	Concentration	17.5 mg/l
Total Cu	Concentration	14.7 mg/l

Based on these results, MSD has sanctioned flushing the chromium, contaminated, water down the sewers located on the south, west, and east sides of the fire damaged building.
